Profile

Currently in my second at the University of Westminster. Open-minded and self-motivated individual, always striving to achieve his maximum potential. Conscientious and able to meet deadlines and goals while maintaining high standards of work. Able to lead a team, work in a team as well as work independently using own initiative. Very adaptable and passionate to learn new skills. I am looking to begin and progress in my career with games development.

Education

BSc Computer Games Development

Sep 2023 – On going

University of Westminster

Game-based computer science degree with a heavy programming influence. The course contains games group projects, as well as independent work, creation of game assets and components using different modelling software, such as Maya and Photoshop. In addition, it contains strong mathematical and algorithms modules as well as object-oriented programming.
